

NCS farvebestemmelser

Colours Collection & pRaL®

Så enkelt fungerer det naturlige farvesystem

NCS er et logisk farvesystem baseret på vor oplevelse af farver. Vi oplever farverne hvid, sort, gul, rød, blå og grøn som "rene" farver; alle øvrige farver er visuelle blandinger af disse 6 grundfarver.

Det indbyrdes slægtskab mellem de ca. 10 millioner farver, som vi kan skelne imellem, beskrives af en 3-dimensionel farvekrop (Figur 1). Den dobbelte kegle kan opløses i 2 projektioner: en farvecirkel (Figur 2) (farvekroppen set fra oven) og mange farvetrekanter (lodrette snit i farvekroppen) (Figur 3)

I farvecirklen, som beskriver farvens "kulørtone", er de 4 kulørte elementærfarver placeret som verdenshjørner på et kompas. I farvetrekanten, der beskriver farvens "Nuance", dvs. farvens indhold af hvid, sort og kulør i en given farvetone, kan vi aflæse såvel farvens sorthed som farvens slægtskab med maksimalkuløren C - begge udtrykt i %.

NCS-farvebetegnelser er de professionelle farvesprog. F.eks. S2030-Y90R, hvor 20 angiver sortheden, 30 kulørtheden og Y90R farvens kulørtone, alle tal i %.

ABET LAMINATI's farvekort på ensfarvede laminater giver mulighed for farvevalg fra alle dele af farvecirklen. Farverne i den lodrette linje i figur 2 har samme "Farvetone" og farverne i den vandrette linje har samme "Nuance". Det er således indbygget en høj grad af familieskab mellem farverne og dermed mange farvekombinationersmuligheder.
